Izipil

Bottle of 50 ml with roll-on

Oil rich in herbal active ingredients engaging the process of definitive depilation

Anatomy of hair:

The hair follicle is composed of two sheaths:

- The external epithelial sheath
- The internal epithelial sheath

The lower part of the hair follicle placed in the hypodermis, presents a bulge called the hair bulb.

The hair bulb is divided into two zones:

- The matrix, location of an intense cellular activity at the origin of the growth of the hair.
- The dermis papilla, which holds the feeding vessels.

Action of Izipil:

IZIPIL acts by weakening the cells at the origin of the growth and the reproduction of the hair. These cells are located in the hair follicle at the level of the bulb (thus in the hypodermis) and also all along the epithelial sheath which surrounds the hair. Those cells are the targets of the inhibition properties of the Izipil natural substances with the objective of progressively eliminating the undesired hair.

Side effects:

The oily texture of IZIPIL also allows for a better hydration of the skin so that the formation of subcutaneous hairs is almost totally stopped. Depilation becomes less painful.

Instructions:

Apply the lotion, with the roll-on ball, immediately after a wax hair removal session. Massage gently and let dry for 20 minutes. It is necessary to remove the hair for the lotion to penetrate and take effect. For best results, apply the lotion for three to four days on the depilated area.

The bulb being taken out, IZIPIL will be able to penetrate more easily and to reach the places where are located the re generation cells which nourish the hair at the level of the bulb and its epithelial sheath.

Izipil does not claim to be able to remove all hair quickly and definitively. But by using IZIPIL regularly after each depilation, you will notice that after 3 to 4 depilation; a thinning of the hair, a longer period of time before hair re-growth, along with a lower hair density evolving gradually towards total hair disappearance.

You will also notice that depilation is not a drudgery any more, even more so that you will not need to do it as often and that your skin will feel soft for a long time.

Composition:

Prunus Amygdalus Dulcis Oil, Cyperus Esculentus Oil, Baccharis Genistelloides Extract, Coriandrum Sativum Seed Oil. Parfum Rosa Damascena Flower Oil, Limonene, Linalool (Extract = Extraction by water vapour)
